Academic Ethics

Description:
On this course, students will learn the principles of research ethic and how to manage the research subject on sensitive and appropriate ways. The learning materials will cover things like how to write research consent, how to make participants’ profile confidential, and how to recruit vulnerable research participants. By the end of the course, students will be able to identify and evaluate key principles of ethical research, apply principles of ethical research, and identify potential ethical issues relating to their own researches.

Material:
